Tel: +44 (0) 1923 208 950.
By reporting side effects, you can help provide more information
on the safety of this medicine.

Information

For Patients

About Azzalure

AZZALURE CONTAINS A SUBSTANCE CALLED BOTULINUMTOXINA WHICH CAUSES MUSCLES TO RELAX. WRINKLES ARE FORMED BY EXCESSIVE CONTRACTION OF THE FACIAL MUSCLES. INJECTION OF SMALL QUANTITIES OF BOTULINUM A TOXIN BLOCKS THE NERVE IMPULSE TO THE MUSCLE, CAUSING IT TO RELAX AND IN TURN SMOOTH THE OVERLYING SKIN TO REDUCE WRINKLES.^{1, 2}

ON THE DAY

Prior to treatment, make-up will be removed and the skin disinfected. You may experience some discomfort from the needle, but your practitioner may choose to manage this pain with a local anaesthetic cream.

HOW IS IT ADMINISTERED?

AZZALURE® is injected just under the skin into the muscle with a small needle.

RESULTS

AZZALURE normally takes an average of 2-3 days² to start working however improvements can be seen as early as 24 hours after treatment.⁴ The speed of onset may vary between individuals.

HOW LONG WILL THEY LAST?

The results from treatment can last for up to 5 months.⁴

REPORTING OF SIDE EFFECTS

If you get any side effects, talk to your practitioner. This includes any possible side effects not listed in the package leaflet.

Adverse reactions tend to be mild to moderate in severity, temporary, reversible and occur in the first week after treatment. Other potential side effects are listed in the AZZALURE® Patient Information Leaflet found inside the packaging. Please ask your practitioner if you have not been given this.¹

POSSIBLE SIDE EFFECTS

- Discomfort from the needle
- Bleeding at injection site
- Eyelid Swelling
- Headache
- Redness
- Swelling
- Irritation
- Bruises
- Itching
- Numbness
- Rash

After your treatment

Even after 4 months, 9 out of 10 patients agreed that results "surpassed" or "met" their expectation³

More than 97% of patients agreed that their results looked natural 3 weeks after treatment³

AFTER YOUR TREATMENT

The treatment may take 10-15 minutes, but consult your practitioner for guidance on this.

12 hours

- Avoid massaging or applying heat to the area
- Avoid activities that cause flushing (heavy exercise, alcohol consumption, hot tub use)²

2 weeks

- Expect a review appointment to check on how the treatment has gone.
